

Mattress Slide-In Set Up Information

This section slides between the mattress and box spring

Thank you for renting this Mattress Slide-In Unit from MassageTableRentals.com! The information above will help you identify the key adjustments you need to make to fit the unit to your mattress. When the unit arrives, it looks like this folded down. Unlock the cam levers to begin setup, and look for any missing height adjustment knobs in the clear plastic sleeve inside the box for your rental, by the return labels. We often ship these separately placed in the box to avoid breakage of the knobs in the frame. Set up as shown.
